Business Analysis Mastery

1

Business Analysis & Requirements Engineering Foundation Level "

Course Overview

Being a business analyst or having the skills of one is essential to the success of business organizations nowadays. In this course, delegates will delve into the role, tasks and responsibilities of the business analyst (BA). Learn effectively to select and employ elicitation, analysis and design techniques for ensuring business need and requirements and optimum solution proposition.

Business Borderlines offers a three-level of Business Analysis and Requirements Engineering training program to guide BA Professionals, IT and Project Managers and Executive Management with a comprehensive understanding and Hands-on Experience for Business Analysis Processes, Documentation, Tools and Techniques.

Through an extensive practical workshops and hands-on exercises, participants will learn to;

- Define the scope of work, analyze business needs.
- Master requirements-elicitation techniques that will work for a variety of projects and audiences.
- Dissect, package, document, communicate, and manage requirements effectively.
- Practice working progressively towards formulation of a business solution design.

The course will empower organization through their program delegates to apply these skills practically in their business analysis as an effective Business Analyst, immediately reducing rework & cost, adding value and building effective relationships with project stakeholders.

Competency-based training designed to build the foundation understanding and application of business analysis skills, tasks, tools and techniques, and validates key competencies based on the Business Analysis Body of Knowledge (BABOK® Guide) – the global standard for the practice of business analysis.

The training relies on a progressive approach to building layers of knowledge as well as interaction with attendees to practice the explained techniques through hands-on workshops and real-world case studies.

The training is divided into two levels:

- Foundation Level – First three days.
- Mastery Level – fourth and fifth days.

Attending the foundation training is a must for the mastery training

The mastery course will emphasize on know-how of the advanced business, financial and decisions analysis techniques.

A question bank of 500 questions is exercised with course attendees for the purpose of preparation for the exam.

Our testimonials

Pierre Ammoun :

Was apprehensive about taking the course, it turned out to be an eye-opener! Explanation by relevant examples with role-play were extremely helpful to understand the concepts. As for the scope of the course, the amount of details covered and how it can be applied in real scenarios is positively scaring! I Highly recommend this course.

Pierre Ammoun
CEO of PCS, Lebanon

Emad ElShorbagy :

The feedback from the attendees was more than perfect, also the organization of the whole process was flawless FCA highly recommends BBL for their training services

Emad ElShorbagy
